PLASTICS PROCESSING TRAINING SEMINARS

SEMINARS DESIGNED FOR YOUR BUSINESS

In response to overwhelming customer requests, Davis-Standard will once again offer an extrusion training course in 2008. The seminar includes training in basic plastic extrusion and will be held at Davis-Standard's Technical Center. In addition to instruction, course participants will have an opportunity to tour Davis-Standard's laboratory and manufacturing facilities, and speak with polymer process engineers and technical specialists. Class size is limited to permit productive student/teacher interaction. Course books and materials are included in the fee.

PRODUCTIVITY – THE KEY TO PROFITABILITY

Machinery that is state-of-the-art. Technologically advanced control systems. The finest in raw materials. A dedicated and skilled team of designers, engineers, and operators. As a processor, you may already have some or all of these elements in your plant, but if they're not working together in total synchronization, your productivity could be lagging . . . both in terms of quantity and quality.

At Davis-Standard, we have devised a way of helping you improve your productivity. Our intensive training seminars bring your personnel face-to-face with virtually every conceivable type of problem they may face on the job. And once those problems are faced, we can teach them how they may be overcome. The result? A more knowledgeable operations staff. A staff better equipped to increase your productivity and profitability.

THE BASICS OF PLASTICS EXTRUSION

April 1 - 2, 2008
October 15 - 16, 2008

This seminar focuses on the basics of plastics extrusion, including extruder components, temperature control, maintenance, and screw design. Instruction on the composition and properties of various polymers and the mechanics of fundamental downstream processes is also included.

The course fee is \$750 per person with a 10% discount given if three or more people attend from a single company. Dinner for the first night is included in the fee and special hotel rates will be given on a first come, first served basis.

In addition, this course can be given in your facility (20 people maximum attendance per class). The cost is \$10,000 plus all travel and living expenses (add \$1,500 for each additional day). Please call Wendy Smith at (860) 599-6119 or email at wsmith@davis-standard.com for scheduling and details.

Online Registration is Now Available
